

COVID-19 TESTING IN OREBIĆ

COVID-19 TESTING WITH PCR OR RAPID ANTIGEN TEST

Hereby we inform you that the Korčula Health Centre is performing PCR and rapid antigen testing on SARS-COV-2 with medical referral for medical indication or for non-medical indication (with payment). If requested, the results can be issued in English. The medical referral for testing patients with medical indication must be issued by their family physician.

In order to prevent COVID-19 infection, people who come for testing for COVID-19 with medical indications (symptoms of COVID-19 infection) must come for testing with their vehicle, must remain in their vehicle at all times, and must wear masks. People who do not have medical indications, in case of impossibility of coming to testing by vehicle, can come by foot, but must wear masks and keep a distance.

PCR and rapid antigen testing will be carried out as „drive-in“ **on the parking lot near the fire department building (Ulica Augusta Šenoje 28) in Orebić on Monday, Wednesday and Friday at 12:00**. We will inform you of change to the schedule.

The patients for PCR and rapid antigen testing in Orebić must book appointment by **website Dom zdravlja Korčula** (Health center Korčula) or by e-mail: **amb.za.covid@dom-zdravlja-korcula.hr**

The patients must book their testing no later than a day in advance (for example testing in Wednesday must be booked on Tuesday). The same is applicable also for the rapid antigen testing.

As well, for children up to age of 10 the rapid antigen testing is not recommended as swab taking is difficult.

PCR test costs HRK 650.00.

Rapid antigen test costs HRK 150.00. (rapid antigen test for tourists who have been 3 or more nights in Croatia costs HRK 75.00. The certificate of the length of overnight stays in Croatia is issued by private renters or Tourist Board by E-visitor system (the certificate can be issued electronic), and it must be sent together with the confirmation of payment. **The price of HRK 75.00 for a rapid antigen test applies only for tourists who have spent 3 or more nights in Croatia, and who need the test to return home, while for all others the price of rapid antigen test is HRK 150.00.**)
